Sabine Parsons, ex-codebreaker, once code-named Oracle, put herself out into the Cold thirteen years ago when her controller, Edward Quintaine died in action. She's lived a quiet life over those years and done her best to forget her past. So it didn't seem like such a bad idea to go on vacation with her best friend in the entire world, Ari Doran. Who just happens to be an agent for Israel's Mossad. But back in the day, Sabine had the ability to foresee the future in prophetic Dreams. She could break code that had less to do with algorithmic equations and more to do with an ability to see the code complete. Both abilities have slept these long, long years. The minute she gets on the plane, her Dreams return in terrible force as full blown Nightmares foretelling the end of the World. The two friends find themselves dropped into the middle of a clandestine war between the intelligence agencies of the world and an organization that would destroy all civilization through the raising of the elder gods of destruction. And not everyone is as dead as Sabine thought they were.
